

NEW YORK PRESBYTERIAN HOSPITAL

DR. VIJAY K. ANAND

DR. THEODORE H. SCHWARTZ

Institute for Minimally Invasive Skull Base and Pituitary Surgery Dynamic Surgical Team

Neurosurgeon Dr. Theodore H. Schwartz and endoscopic sinus surgeon Dr. Vijay K. Anand are outstanding specialists in minimally invasive, endoscopic surgery who combine their skills in the operating room. Their textbook, *Practical Endoscopic Skull Base Surgery*, presents the latest trends in the field. Working together as co-directors of the Institute for Minimally Invasive Skull Base and Pituitary Surgery at New York Presbyterian Hospital, the two physicians use image-guided, minimally invasive surgical techniques to remove tumors of the pituitary, skull base and brain through the nose, thus avoiding any skin incisions.

Dr. Anand is internationally known for his work in endoscopic sinus surgery and anterior skull base surgery. He is a clinical professor of otolaryngology at the Weill Cornell Medical College and the director of the rhinology laboratory.

Dr. Schwartz has received numerous awards for his pioneering research in the surgical treatment of brain tumors and epilepsy. He is an associate professor of neurosurgery at Weill Cornell Medical College and the director of brain tumor, epilepsy and pituitary surgery.
